PROFILE

I am a first-year B.Tech Computer Science and Engineering student at Ahmedabad University with a strong interest in software development, artificial intelligence, and robotics. I am currently building a solid foundation in programming, data structures, and core computer science concepts while actively exploring frontend development and Python. I enjoy working on practical projects, solving problems on platforms like LeetCode, and learning new technologies through courses and hands-on experimentation.

Alongside my academics, I maintain a disciplined routine focused on fitness, skill-building, and personal growth. I aim to leverage my technical skills, curiosity, and work ethic to secure impactful internships in the coming years and build a career in AI and advanced computing.

WORK SUMMARY

• Internships:

1. Renav Technologies (December 2025 - Present)

Renav Technologies is a web development firm where I completed a one-month internship. I accomplished various tasks, including designing and developing a personal resume website using HTML5 and CSS3.
